

# STATEMENT OF QUALIFICATIONS

# CAPABILITIES

At Vollrath, our dedicated team of designers, engineers and fabricators will work closely with you throughout the process to explore all your options and create a solution that's unique to the customer. We have the staff, equipment and expertise to transform raw material to finished product utilizing the latest in metal and millwork tools and equipment. We can even assist with installation.

## CERTIFICATION

NSF 2  
NSF 7  
NSF Component

## STANDARD

Stainless Fabrication  
Serving Casework  
Custom Refrigeration  
Breath Guards  
Architectural Fabrication  
Metal Fabrication

## CUSTOMIZABLE

Quartz, Solid Surface, Acrylic, Stone, Tile, Glass  
Architectural  
Full Line of Velocity Breath Guards

## METALS

Stainless Steel

Copper

Brass

Aluminum

Black Iron

Galvanized

Other Metals

## OPTIONAL COMPONENTS

Drop-Ins  
Hot Food Merchandisers  
Cold Food Merchandisers  
Hot/Cold Food Merchandisers Combination  
Induction  
Electrical  
Refrigeration  
Heat Strips  
Installation of components provided by others

## COMPLETE INSTALLATIONS

Nationwide Installations

# *Lasting* STAINLESS FABRICATION

Our stainless steel fabrication is only limited to the imagination. Some call these products “back of the house,” but the complexity of fabrication is something we bring to the forefront.

## EXAMPLES OF ITEMS:

- Dish Tables
- Chefs Counters
- Worktables
- Mobile Carts
- Sinks
- Wall Cabinets
- Shelves
- Rack Shelves
- Prep Tables
- Drawers
- 3-Comp Sinks
- Bain Marie
- Work Counters
- Cabinets
- Bar Tops
- Canopies
- Foot Rails
- Breath Guards
- Drink Rails
- Equipment Stands
- Elevator Trim
- Escalator Cladding
- Floor Troughs
- Hot Pans
- Anything Custom

# *Servery* CASEWORK

Our full stainless base construction gives you infinite possibilities and options of tops and millwork.

## SERVERY COUNTERS

- Cashier Stands
- School Carts
- Kiosks
- Portable Stadium Carts
- Snack Displays
- Display Cabinets
- Cooking Stations
- Reception Desks
- Open-Air Merchandisers Built into Casework
- Anything Custom per your Design and Specs

## MILLWORK CASEWORK

- Cabinets
- Servery Counters
- Desks
- Shelving
- Slat Walls
- Storage Cabinets
- Wall Cabinets
- Carts
- Cashier Counters
- Health Care Cabinets
- Anything Custom per your Design and Specs

## *Complete* **MILLWORK**

We have a staff that combines seasoned experience with individualized customer service to provide you with the same superior products and services that you have come to expect from Vollrath.

- We work with a wide variety of materials and finishes, from laminate and veneers to exotic hardwoods.
- We work within many different market segments including foodservice, health care, and retail with a variety of products.
- These products consist of, but are not limited to commercial casework, bar tops, die walls, reception areas, panels and any other custom cabinet work that you or your customer can dream of.

From concept through completion, Vollrath is here to build an exceptional product through a successful partnership with our clients.

# Cutting-Edge BREATH GUARDS

RS - QS - SS - ES & Custom Models

## SUPPORTS AND FINISHES

- Stainless Steel one-inch Standard Supports with Brushed #4 Finish.

## GLASS AND END PANELS

- Standard Glass is 3/8 Flat Panel Edges

## ELECTRICAL

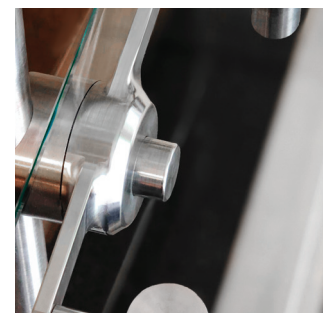

- Vollrath Low-Profile Heat Strips
- Optional Ecobrite 4K LED Display Light
- Other Optional Heat Strips Available

## MOUNTS

- Through Counter
- Surface Above Counter w or w/o Stainless Flange Cover
- Narrow Above Counter w or w/o Stainless Flange Cover

## PLEASE CONTACT US FOR CUSTOM OPTIONS

- Tubing Options
- Stainless Finishes
- Mirror Finishes
- Powder-Coat Finishes
- Angled or Square-End Glass
- Other Electrical Combinations
- Other Heat and Light Combinations
- Flip-Up Front Glass

Eight pre-set positions, promising versatility and consistency, and the simple adjustment mechanism allows one person to make adjustments quickly and easily

# Custom REFRIGERATION

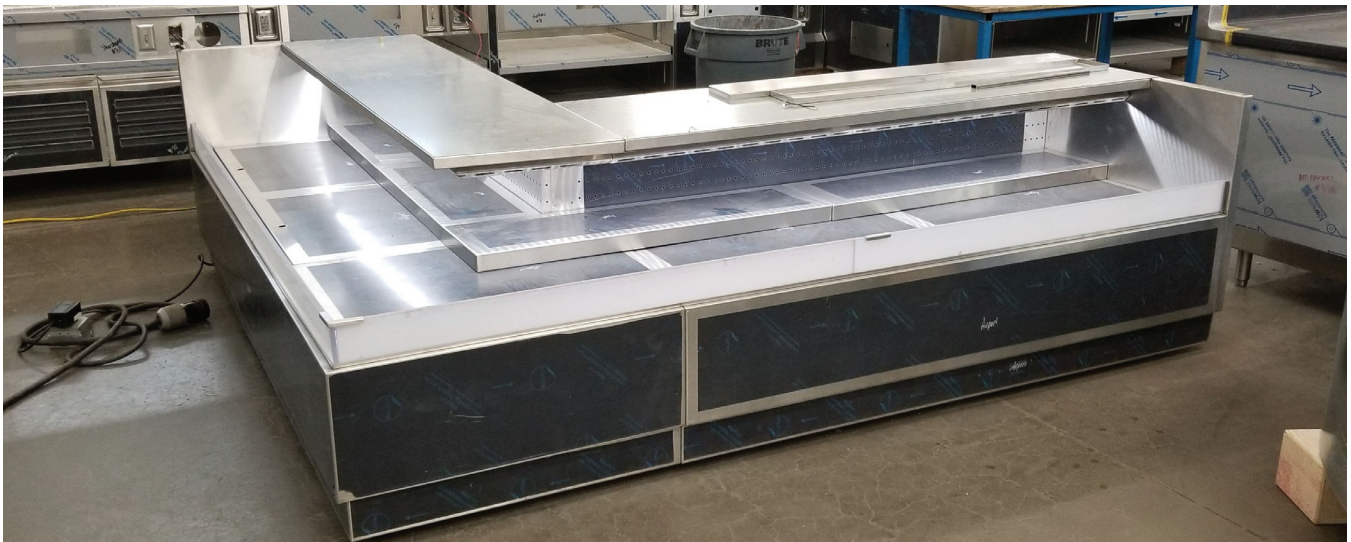

We know that customization involves a lot of decisions – and it can be time-consuming to get approval from your entire team. We will help you through every step of the process. With our NSF7 certification, Vollrath can build custom refrigerated units from design through installation. Some of these components and units include:

## STANDARD OPTIONS

- Cold-Stone Frost Tops
- Cold Pans
- Universal Hot and Cold Pans
- Raised Rails
- Refrigerators
- Freezers
- Chef's Counters
- Seafood Displays
- Wine Coolers
- Custom Units per Design and Function

## ADDITIONAL OPTIONS

- Glass Doors
- Digital Temperature Gauges
- Concealed Spring-Loaded Hinges
- Cord and Plug
- LED Lighting
- Custom Shapes to Fit Design Requirements

# *Custom* WINE COOLERS

Features we build into our Custom Wine Coolers:

- Adjustable Temperature Control
- Built for Red and White Wines
- Adjustable Stainless Bottle Racks
- LED Lighting with On/Off Switch
- Self-Contained and Remote Refrigeration
- Insulated Glass Doors
- Lockable
- Adjustable Padded Feet
- Digital Temperature Read
- Condensate Pan or Drain

*Radisson Blu Mall of America Project*

# Explore ACCESSORIES

Vollrath designs and fabricates a variety of custom accessories from a host of materials including: stainless steel, copper, brass, zinc, aluminum, acrylic, stone, wood, laminates, veneers, and more.

- Corner Guards
- Shelves
- Sinks
- Pass-Through Shelves
- Trim
- Wall Panels
- Bar Tops
- Drink Rails
- Floor Troughs
- Wall Coverings
- Elevator Trim
- Cove Base
- Bumpers
- Railings
- Exterior Decor
- Foot Rails

## *Complete* INSTALLATION

If Vollrath is selected to install a project, our install project manager will have internal preconstruction meetings, coordinate delivery and keep the job schedules. This gives the customer a single point of contact for this phase of the project.

- Our install manager and installers will assist the customer with field measurements and site coordination of field welds, access points, etc., during the start of the project. This will ensure that many of the projects questions are asked prior to start.
- A key part to our turn-key projects is to have masonite templates cut on our CNC to tight tolerances, including utilities, to assist with field measurements. This helps ensure all trades have the correct information to guarantee the project's finishes above and utilities below are coordinated correctly per the design intent.
- As a quality control point, a final walkthrough with the client is done to close out the project, if requested.

## Limitless

### PREFABRICATION

Prior to fabrication, our internal CAD department produces shop drawings and work with the designers, architects and general contractor/owner to review and complete final drawings.

- Fabrication starts after a prefab meeting with our manufacturing engineer, CAD and project manager. Materials and equipment are reviewed, and the project is put into the schedule cue for fabrication.
- Once complete, the product is shipped from our facility directly to the project site for installation.

## *Internal* Procedures

We work together as a team with the client and their teams. At conception of a project, our project manager will oversee the entire project and is in control of all aspects of the project through completion and closeout.

- Our project managers work and communicate with the designer, architect, gc or owner. They will oversee the schedule and coordinate fabrication and installation of the project with the manufacturing engineer and Installation Foreman.
- Our manufacturing engineer monitors the production phases of stainless, electrical, millwork and stone and is responsible for scheduling and completion of the project. He or she ensures the equipment is delivered per the schedule.
- Our installation foreman works directly with the project manager and owner representative to ensure design details are matched with a seamless installation and coordination with all trades on site.
- A final walk-through and project closeout is performed with the owner and the project manager to ensure expectations are met and/or exceeded.
